## Effective

The unique healing properties of our Australian Wadi-Wadi Jojoba enables our skincare to deliver visibly transformative results, naturally.

## Ethical

We don't subscribe to animal testing, and any ingredients we don't grow on our Beresford Farm are ethically sourced.

## Safe

We don't use phthalates, sulphates (sls, sles), silicone, parabens, mineral oil, artificial colours or fragrances.

## Sustainable

Our farm adheres to the highest sustainability practices and our packaging incorporates recycled materials.

# Jojoba

*[ho-ho-ba]*

The incredible healing properties  
of this ancient super-ingredient  
enables our unique skincare to  
deliver visibly transformative  
results, naturally.

Help your skin help itself.

## Our Farm

The nutrient-rich soil of Yenda, in regional NSW, is renowned among vineyard owners and farmers all over the world. Our family has grown and mastered our signature Australian Wadi-Wadi Jojoba for over 20 years on our Beresford Farm. It's the only place on earth Jojoba this effective could be produced. Beresford is now the last nurtured Jojoba farm in Australia and spiritual home of Jojoba.

## Beresford & Beyond

The Jojoba plant itself is carbon negative so it actually removes carbon from the atmosphere. Perfectly suited to the Australian climate, the plant is drought tolerant with no pests or diseases, so we have no need to use chemicals on our plants. We let nature do the work!

## What makes our Jojoba different?

Our unique strain of Jojoba, the Australian Wadi-Wadi Jojoba, is special as it has been proven to contain higher levels of omega 9 than other strains of Jojoba.

Our Jojoba is extra virgin cold-pressed and then filtered fourteen times for absolute purity.

Grown in nutrient-rich soil, teeming with antioxidants, omegas 6 and 9 and vitamins A, D and E, our high- performing Australian Wadi-Wadi Jojoba is the reason why our skincare can be so effective across all skin types, life stages and concerns — without the need for harmful additives or chemical nasties.

SMARTER NATURAL SKINCARE

 Australian Jojoba

## How does Jojoba work?

Jojoba has the same molecular structure as the natural wax esters in our skin. Our skin's sebum contains 30% of these wax esters. As we age, the wax ester content in our skin begins to diminish, and Jojoba is the only known plant source of wax esters that is able to replenish these lost esters.

Our skin recognises Jojoba as its own as the wax esters are similar to human sebum wax esters.

# Benefits of Jojoba

Australian Jojoba is suitable for all skin types.
